

Malawi Fact Sheet

SEVA'S WORK AT A GLANCE: In country since 2018 | Partner: 1

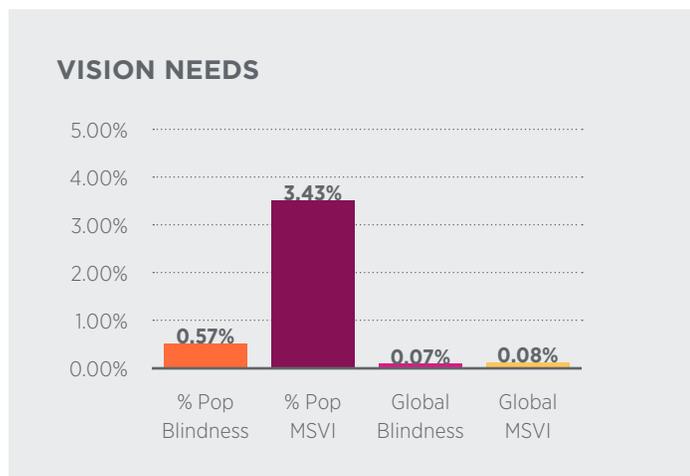

Country Overview

- » Located in Eastern Sub-Saharan Africa
- » Malawi spans 45,747 mi²
- » Population: 18.1 million people
- » 2019 Human Development Index Ranking: 172 of 189 countries¹

Scope of Eye Care Needs

- » 0.70% of Malawi's population is blind (49K), as compared to 0.15% in the United States
- » 3.63% of the population has moderate to severe vision impairment or MSVI (290K), as compared to 1.25% in the United States²
- » 0.14% of global blindness
- » 0.13% of global MSVI

Nationwide Eye Care Response

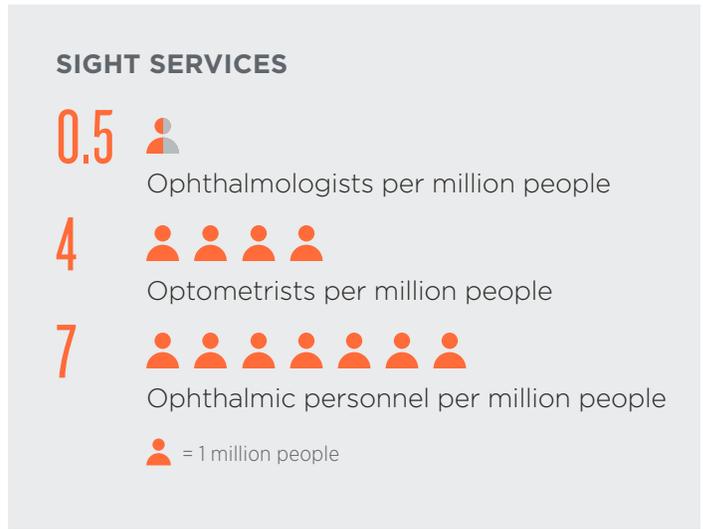

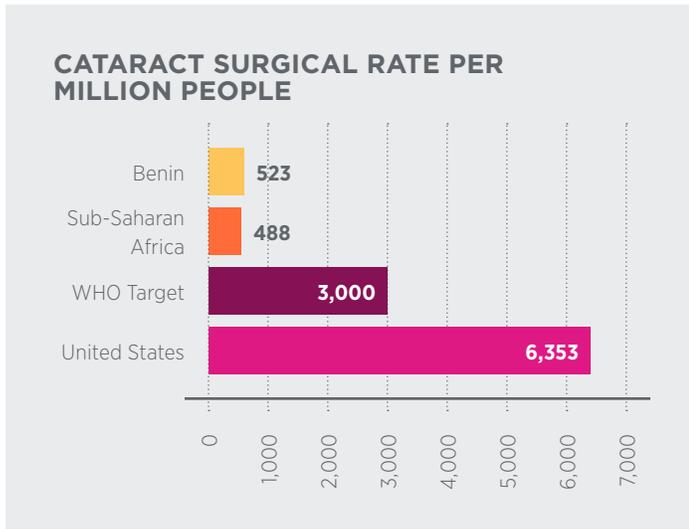

Sub-Saharan Africa's median Cataract Surgical Rate (CSR) is 488 — one third of the global average and 1/13th of the average for high-income countries. Seva works to improve these rates through our hospital management systems and training support in Malawi, focusing on improvement in the following Global Action Plan indicators for universal eye health.

- » Malawi's CSR was 523 surgeries per million in 2013, as compared to the US CSR of 6,353
- » 0.5 ophthalmologists per million people in Malawi as of 2014 (US = 60 per million people)
- » 4 optometrists per million people as of 2014 (56 total)
- » 7 AOPs per million people in 2014 (106 in total)

MALAWI FACT SHEET

Seva's Approach in Malawi

Seva partners with the Kilimanjaro Centre for Community Ophthalmology (KCCO) to reduce blindness in Malawi. Established in 2001 in response to the VISION 2020 initiative, KCCO is the largest organization in Africa dedicated to reducing blindness through community ophthalmology training. With Seva's support in hospital management systems and training, KCCO partners with local governmental hospitals to train community health workers, conduct outreach trips to rural communities without regular access to eye care, provide clinical training for ophthalmologists and cataract surgeons, and providing funds for medical treatments for those who cannot afford them. In Malawi, Seva and KCCO partner with the Queen Elizabeth Central Hospital, Blantyre to expand its pediatric eye care program. This support includes necessary consumables, eye health promotion, training of key informants across communities who can identify eye health problems in children, as well as surgical support. It also contributes toward a coordinator tasked to manage the pediatric outreach efforts.

Impact of COVID-19 in Malawi

COVID-19 continues to spread across the country but at a lesser rate than earlier in the year. Most businesses have reopened, schools are in session, and travel restrictions have been lifted. Seva's partner hospital has been able to resume most operations and is beginning to provide some community-based screening activities using enhanced safety protocols.
